Structural Integrity Associates, Inc. Acquires ANATECH Corporation

Structural Integrity Associates, Inc. ’s Acquisition of ANATECH Corporation Combines and Expands Nuclear Fuels and Structures Engineering Expertise

For Immediate Release
March 6, 2013

San Jose, California – Structural Integrity Associates, Inc. announces the acquisition of ANATECH Corporation, an industry leader in engineering and scientific consulting.

Founded in 1978 and based out of San Diego, California, ANATECH Corporation is a leading engineering consulting firm for nuclear fuels and structures solutions. Their key clients are in the power plant industry and also include the United States National Laboratories.

Structural Integrity Associates, Inc. (SI), headquartered in San Jose, California, is a 30 year old, employee-owned engineering consulting company. Structural Integrity has a dozen offices across the US, including four international sites. Their renowned integrated services include license renewal, nondestructive examination, asset management, fatigue management and stress analysis for nuclear power plants, fossil power plants, combined cycle plants, and oil and gas pipeline transmission and distribution.

“As part of Structural Integrity’s continued leadership in integrated solutions, the new acquisition of ANATECH will complement our engineering expertise and innovative solutions. Having worked together on many projects for industry clients and having serviced many of the same clients, the acquisition will be a natural integration of resources and expertise,” said Laney Bisbee, CEO of Structural Integrity Associates, Inc.

Joe Rashid, CEO and Founder of ANATECH, shared Mr. Bisbee’s sentiments. “ANATECH’s goals, values and mission closely align with Structural Integrity’s such that power plant clients will benefit from the expanded competencies and areas of expertise. We’re proud to become part of such a world-class organization.”

About Structural Integrity Associates, Inc.

Structural Integrity Associates, Inc. is an internationally recognized leader in the prevention and control of structural and mechanical failures, with a strong presence in the power generation industry. With headquarters in San Jose, CA, Structural Integrity serves clients worldwide through branch offices located throughout the US and Canada, as well as through affiliates located in China, Japan, Korea, and Spain. Structural Integrity’s expertise encompasses a broad range of issues critical to the commercial success of both fossil-fired and nuclear power plants, including
boiler integrity management, root cause analysis and data management programs that have become vital to the continued operation of Fossil power plants worldwide.
